THEATRELIGHT NZ

Manufacturer of Theatre Lighting Control Systems

The SingleFade and Twinfade standalone digital dimmer modules are ideal for controlling several kilowatts of incandescent lighting. With a module width of only 86mm, a number of units can be used side by side to form a small lighting control centre for location or studio lighting, exhibitions, and theatres.

These units feature digitally controlled dimming with dual SCRs per channel, MCB shortcircuit protection, and toroidal chokes for noise filtering to studio requirements. Built-in soft-start circuitry ensures longer lamp life for expensive television and film light bulbs.

Both the SingleFade and TwinFade are small and compact while their rugged construction enables them to withstand the rigours of touring.

Features:

- Compact size making it highly portable
- Singlefade offers 1 channel at 10 Amps total load
- TwinFade offers 2 channels at 10 Amps total load
- Flash key for each channel
- MCB circuit breaker protection doubles as power switch
- Mains input and output via 1 metre cables allowing for any type of connector to be installed
- Power on LED indication

Specifications

Power:

- Mains supply, 90-250 AC 50/60hz
- Power input on rear via 1 metre cable
- Power output/s on rear via 1 metre cable/s
- Total maximum load: 10 Amps

Construction:

- Black powder-coated case
- Durable silk-screened front

Dimensions

Weight:
SingleFade: 1.6Kg
TwinFade: 2.2Kg
